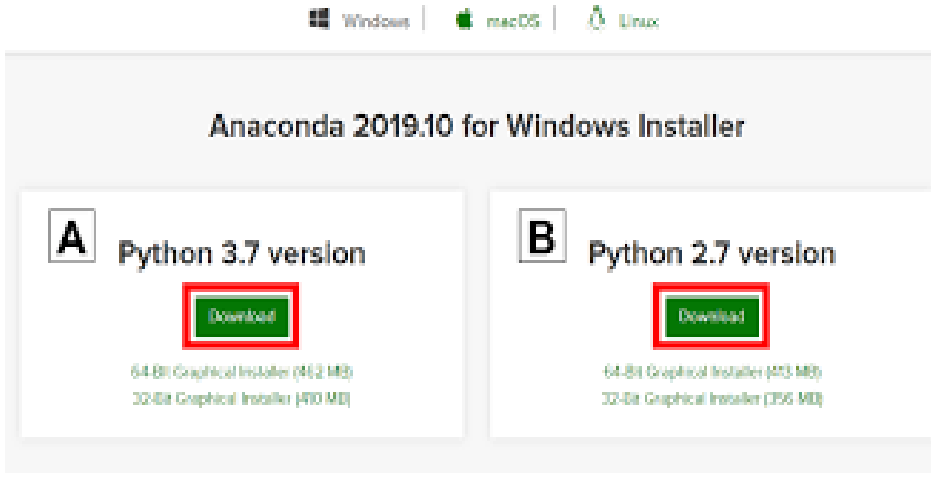
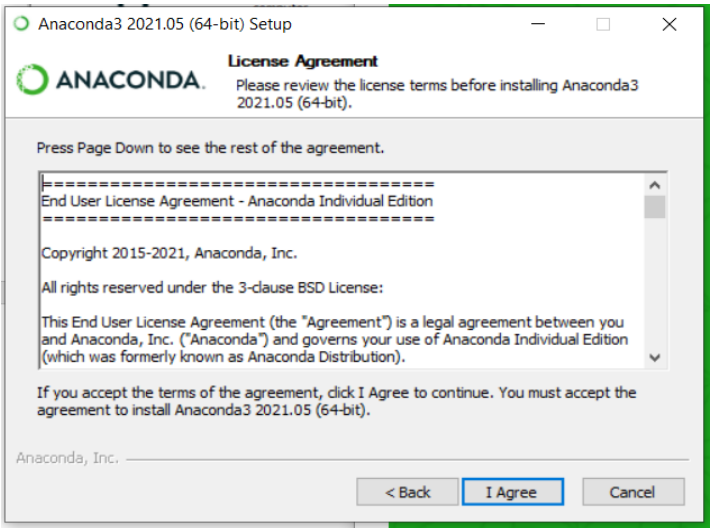
Show and write the steps of downloading Anaconda and Jupyter Notebook. Also, check the version of Python installed. Take the screenshot and paste as output.

STEPS FOR ANACONDA INSTALLATION:

1. Go to the Anaconda Website using URL(www.anaconda.com) and choose a Python 3.x graphical installer (A) or a Python 2.x graphical installer (B). but I have installed the anaconda python 3.7version. and using currently python 3.9.5 version.



2. Now click on 3.x version and after the downloading process a setup screen appears. click on next and complete the setup process. The following steps are to be followed.



Anaconda3 2021.05 (64-bit) Setup
ANACONDA.

Anaconda3 2021.05 (64-bit) Setup
ANACONDA.
Advanced Installation Options
Customize how Anaconda integrates with Windows
Advanced Options
Add Anaconda3 to my PATH environment variable
Not recommended. Instead, open Anaconda3 with the Windows Start menu and select "Anaconda (64-bit)". This "add to PATH" option makes Anaconda get found before previously installed software, but may cause problems requiring you to uninstall and reinstall Anaconda.
Register Anaconda3 as my default Python 3.8
This will allow other programs, such as Python Tools for Visual Studio PyCharm, Wing IDE, PyDev, and MSI binary packages, to automatically detect Anaconda as the primary Python 3.8 on the system.
Anaconda, Inc.
