Show and write the steps of downloading Anaconda and Jupyter Notebook. Also, check the version of Python installed. Take the screenshot and paste as output.

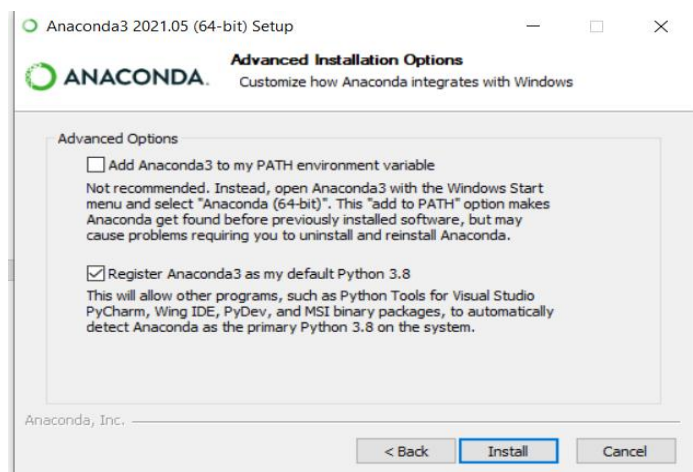

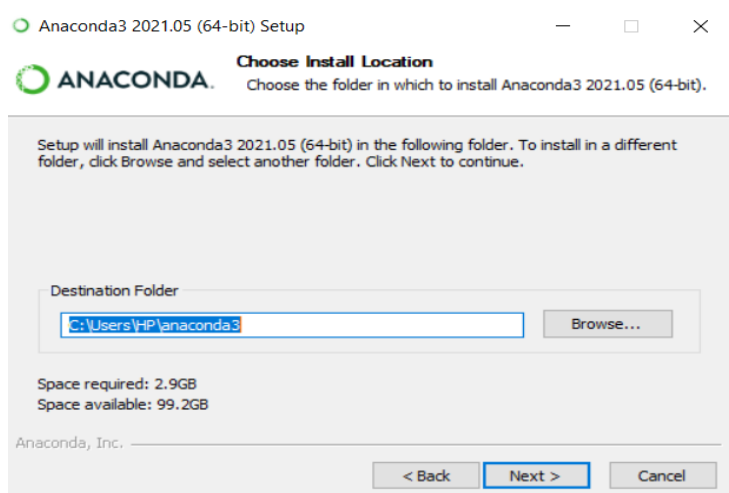

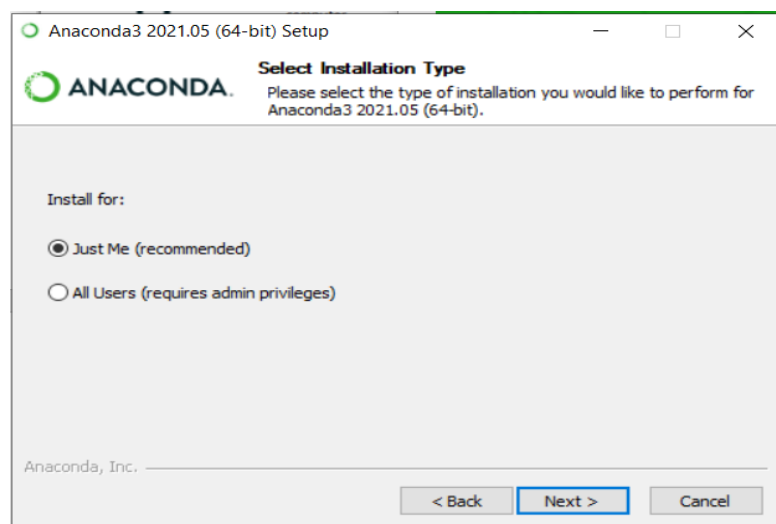

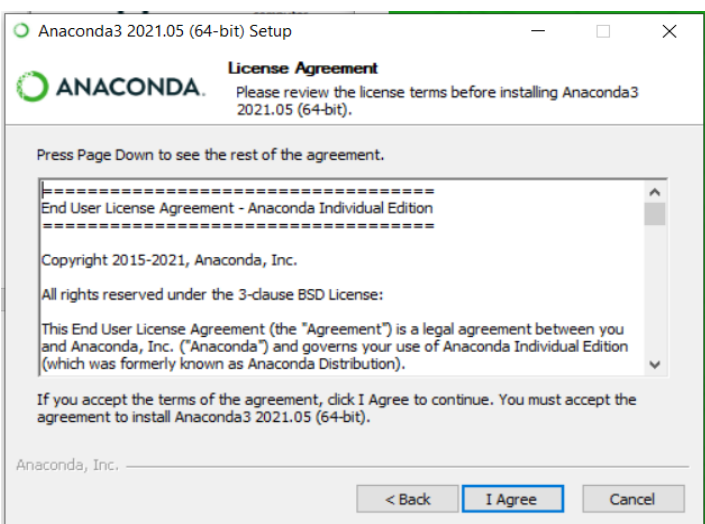

STEPS FOR ANACONDA INSTALLATION:

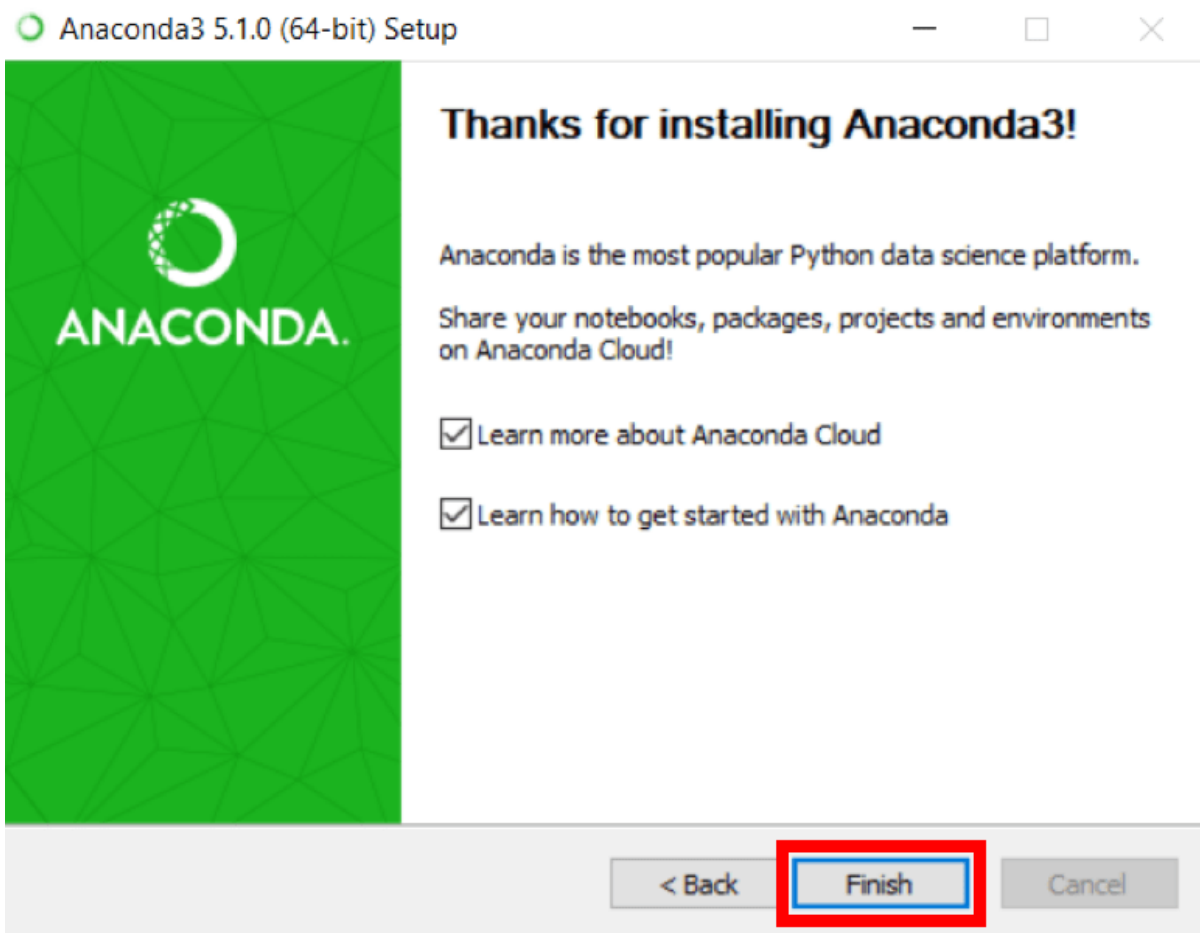

1. Go to the Anaconda Website using URL(www.anaconda.com) and choose a Python 3.x graphical installer (A) or a Python 2.x graphical installer (B). but I have installed the anaconda python 3.7version. and using currently python 3.9.5 version.

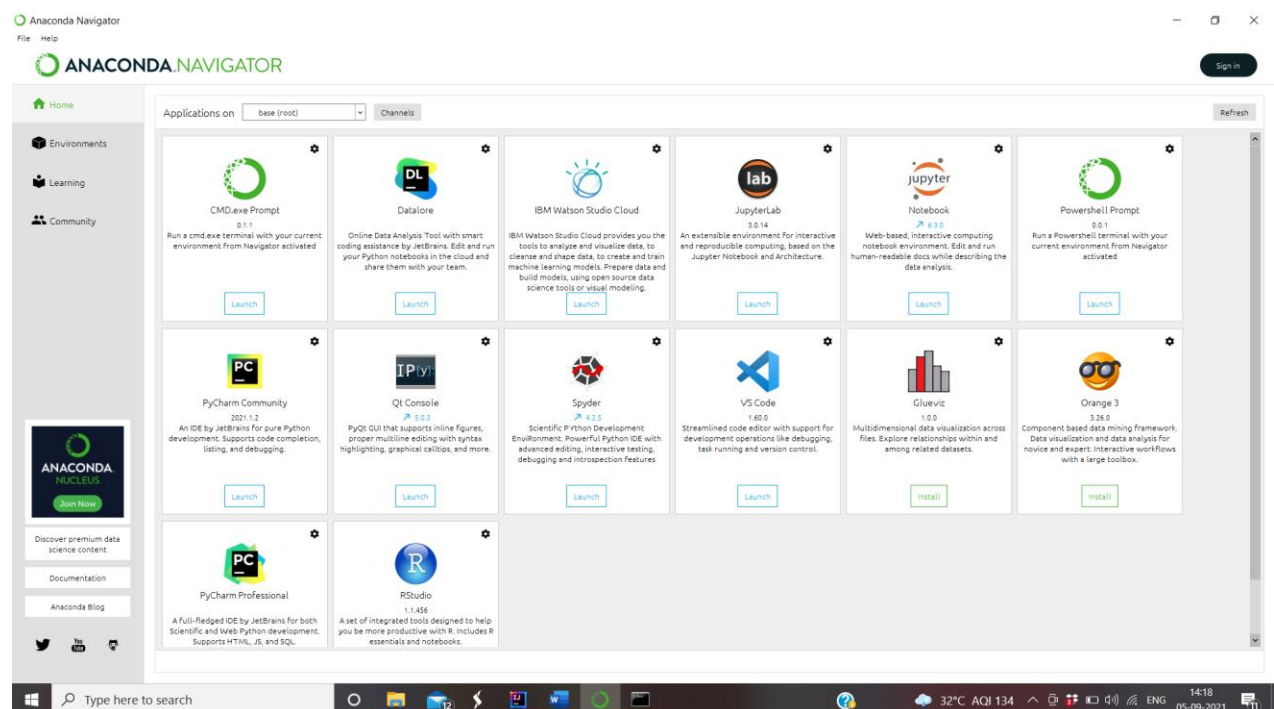

2. Now click on 3.x version and after the downloading process a setup screen appears. click on next and complete the setup process. The following steps are to be followed.

3. after installation open the anaconda navigator and start menu.

4. From here click on launch jupyter and you are good to go.

5. NOW THE VERSION OF PYTHON I USE IS 3.9.5

 Command Prompt

```
Microsoft Windows [Version 10.0.19041.1165]  
(c) Microsoft Corporation. All rights reserved.
```

```
C:\Users\HP>python --version  
Python 3.9.5
```

```
C:\Users\HP>■
```
